

Ramy Ahmed Basuoney

Cairo, Egypt, EET • +201225913629 • ramybasuoney@gmail.com • [Linkedin](#) • [Github](#)

Frontend Engineer with 3+ years of experience designing and developing scalable, reusable web components and performant user interfaces. Proficient in React.js, Next.js, and modern frontend tools. Passionate about improving user experience, optimizing performance, and collaborating across teams to build high-quality products.

PROFESSIONAL EXPERIENCE

Software Engineer (Frontend) • Baims, Kuwait

Feb 2022 - Present

- Revamped Baims' legacy architecture using Next.js and TypeScript, leading to a 30% boost in performance and smoother service delivery.
- Built a scalable authentication and routing system to seamlessly integrate legacy and modern apps.
- Developed a teacher portal for managing subjects, courses, and lectures, improving instructor satisfaction by 20%.
- Implemented a real-time search system with Algolia, enhancing search speed and user experience by 40%.
- Integrated Vimeo API for video upload and management, reducing instructor workflow time by 50%.
- Designed a cookie-sharing mechanism to sync sessions across platforms, enabling cross-platform authentication.
- Built a nested sorting system for structured content navigation (sections → courses → lectures).
- Contributed to Baims' new AI platform aimed at improving student academic success.
- Enhanced responsive design across multiple projects to support all screen sizes and devices.

Software Engineer (Frontend) • FindSquare, KSA

May 2021 - Feb 2022

- Crafted a dynamic, responsive UI with **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Built clean, accessible components using **shadcn/ui** for fast user interactions.
- Implemented multi-step booking flows for various venue types.
- Added interactive filters, calendars, and availability checks.
- Optimized UX for all devices with fast load times and smooth transitions.
- Collaborated with backend to display real-time availability and booking status.

Software Engineer (Frontend) • Takhya.ai, KSA

Oct 2020 - Mar 2021

- Developed an engaging UI with **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Built interactive components for media generation and real-time previews.
- Integrated with AI APIs to handle image, video, and sound rendering on the frontend.
- Designed intuitive flows for creators to generate and edit content in seconds.
- Focused on performance, responsive design, and smooth user experience.
- Created content layouts optimized for social sharing and creator tools.

EDUCATION

Bachelor of information technology (IT) with grade Very good (GPA 3.24).

Oct 2011 - May 2015

- Lead graduation project & developing a website using dream weaver, swish max and Java script.
- Help my friends at the graduation project team to understand the basics of web development

PROJECTS & CONTRIBUTIONS

NextJs 14 • Baims

- Help the team with search and upgrade from NextJs 12 to 14 so we can start using all NextJs 14 new features.
- Create a demo project with NextJs 14 to explain all new features to the team.

React portfolio • Freelance

- Build to graduate his own portfolio to display his work & information with beautiful UI.

Youtube clone • Freelance

- Developed a youtube clone using youtube apis with the most features that youtube has.
