_____

Frontend Engineer with 3 years of experience building scalable/reusable components using: JavaScript, ReactJS/NextJS and CSS/SCSS...

- Optimized **old Baims** responsive issues to fit different screens sizes.
- Developed a new **Baims** website to increase students interaction **3x** by building a new Baims App arch.
- Developed a new **Teacher portal** to instructors so they can manage subjects, courses and lectures easily.
- Developed a new **Baims AI** website ready to help students to succeed in their class!.

PROFESSIONAL EXPERIENCE

Software Engineer (Frontend) • Baims, Kuwait   **Dec 2020 - Present**
- Revamp old Baims with new structure to deliver Baims services better & faster by NextJS/TS
- Build Auth/Routing structure that handle Auth & routing between new App & old App together and that help Baims to launch new App as parts using NextJS/TS.
- Implement Redirect system based on caching to handle redirection between new App & old App Using NextJS/TS.
- Implement Sharing cookie between new Baims and teacher portal so the instructor navigate without login again.
- Developed fast instant search using algolia package.
- Implement nested sorting system to sections, courses and lectures.
- Integrate vimeo api to allow the teacher to upload or delete or edit videos.

EDUCATION

Bachelor of information technology (IT) with grade Very good (GPA 3.24).   **Oct 2011 - May 2015**
- Lead graduation project & developing a website using dream weaver, swish max and Java script.
- Help my friends at the graduation project team to understand the basics of web development

PROJECTS & CONTRIBUTIONS

NextJs 14 • **Baims**   **Jan 2024 - Present**
- Help the team with search and upgrade from NextJs 12 to 14 so we can start using all NextJs 14 new features.
- Create a demo project with NextJs 14 to explain all new features to the team.

React portfolio • **Freelance**   **Oct 2020 - Nov 2020**
- Build to graduate his own portfolio to display his work & information with beautiful UI.

Youtube clone • **Freelance**   **Aug 2020 - Sep 2020**
- Developed a youtube clone using youtube apis with the most features that youtube has.
